

Prescription Drugs, Lab Testing, Imaging & More

Prescription Savings

HealthRight iCare has negotiated savings on prescriptions that are available at your local pharmacy, or via mail order or specialty pharmacies. You can save an average of 47% on medications (up to 65% off generic drugs!) at over 80% of pharmacies nationwide.

Note: The Drug Plan program is NOT insurance. It is a reduced-fee-for-service program that provides discounts at certain pharmacies. In order to receive the special pricing, you must pay in full at the time of service.

Lab Testing

HealthRight iCare has a partnership with one of the nation's leading laboratories. As with other HealthRight services, this national partnership brings affordable convenience and high-quality service. Lab testing enhances the healthcare options you have as an HealthRight iCare member. When your doctor requests lab testing as part of a diagnosis or treatment plan, HealthRight iCare makes it easy to schedule and arrange lab testing services at over 1,600 locations, all at a discounted rate. Test results are sent back to HealthRight iCare, and our nurses will call to review the results and coordinate next steps.

These valuable products and services can help your members save money and make the most of their HealthRight iCare membership.

Imaging Studies

HealthRight iCare provides subscribers with high-quality diagnostic imaging solutions at approximately 3,000 U.S. locations, at the lowest possible cost. HealthRight iCare's partnership with imaging centers significantly lowers the cost of radiology services. For example, as a result of your subscription you pay half the average cost for an MRI (potential savings of \$750). HealthRight doctors are able to prescribe MRI, CT scan, or Ultrasound tests through a TeleConsult. Then, the HealthRight iCare nurses work with you to identify the closest imaging location for your specific testing needs — saving both time and money. Test results are sent back to HealthRight iCare, and our nurses will call to review the results and coordinate next steps.

Wellness Programs

At HealthRight iCare, we support all facets of healthcare, including general wellness. While the core of Health Right iCare is providing access to healthcare services, it is important to maintain your overall health and prevent illness. That's why HealthRight iCare also includes a carefully screened selection of vitamins and supplements. HealthRight iCare nurses are available to answer any questions and help evaluate vitamin and supplement products. In addition, HealthRight has developed a partnership with a specialist in the area of nutrition and obesity. By providing tools to take control of your weight, HealthRight iCare will save you money on ongoing related medical expenses. Our combined services and products support weight management to make sure you get healthy and stay healthy!
